

# Traffic Advisory

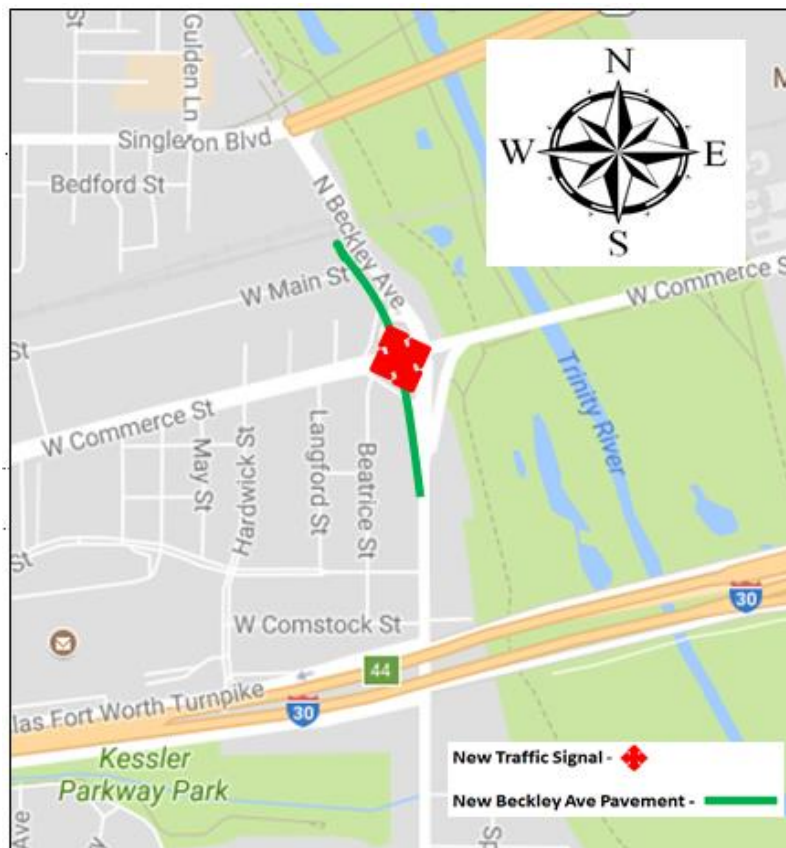

## Beckley Avenue at Commerce Street Construction Project

### *Major Traffic Switch - Tuesday, November 28, 2017*

A major traffic switch is scheduled for **Tuesday, November 28, 2017** for the ongoing Beckley Avenue and Commerce Street intersection reconstruction project. The planned traffic switch includes switching northbound and southbound Beckley Avenue traffic onto the new concrete permanent lanes and activating the new traffic signal at the intersection of Beckley Avenue and Commerce Street. After the traffic switch is implemented, all traffic movements at the Beckley Avenue and Commerce Street signalized intersection will be available. **However, motorists should expect delays and plan accordingly.**

The Beckley Avenue at Commerce Street project scope entails realigning the Beckley Avenue travel lanes and providing an at-grade traffic signalized intersection. The project will also provide new sidewalks, dedicated on-street bike lanes on Beckley Avenue, pedestrian lighting, landscaping, drainage and water/wastewater improvements. The \$7 million construction project is estimated to be substantially complete in late January 2018.
